Hepatic portal circulation review sheet 32

NAME _____ Microstruction of blood vessels 1. Cross-sectional view of an artery and vein is shown here. Identify each; and on straight lines to the sides, note the structural details that allow you to perform the following identification: arteries Veins (vessel type) Open vessel type, rounded (a) (a) slightly collapsed lu thinner than media (b) thick media (b) Now describe each tunic more fully by selecting its characteristics from the key below and placing the appropriate key letters on the answer lines. e. d b a, f, c Tunica intima Tunica media Tunica externa ... show more content... Name all the structures (blood vessels, heart chambers and other structures) that pass through on the road. interior vena cava, right atrium, trimeal valve, right vensal, semi-niche lung valve, pulmonary trunk, right or left pulmonary artery, lobe artery, pulmonary capillary bed in lung, alveoli 9. Monitor the path of oxygen molecules from the bronchial lungs to the right atrium of the heart. Name all the structures through which it passes. Around the gas exchange areas. alveoli, alveove wall, pulmonary vein, atrium mitral valve, lventricle, aortic leukocyte semi-leukocyte valve, aortic, system artery, capillary bed, system vein, SVC, R atr 10. Most of the arteries of the adult body carry oxygen-rich blood, and the veins carry depleted oxygen, carbon dioxide rich in blood. How does this differ in the pulmonary and vein arteries? pulmonary arteries carry poor oz-blood to the lungs, where the pulmonary veins carry O2-rich blood from the lungs to the left side of the heart 11. How do the arteries of the pulmonary circulatory differ structurally from the system arteries? What condition is indicated by this anatomical difference? pulmonary artery-like anatomical veins, they have thin walls Liver Portal Circulation 12. What is the source of blood in the liver portal system? blood flowing from the digestive organs 13. Why this blood
